

(b) At the earliest possible time following the filing of a request designated as experimental, or following the determination of any question as to whether such designation is proper, holding that such designation is proper, the parties will be required to file statements of the issues they perceive in the case. Each such statement shall designate with particularity those issues the party believes to be or involve genuine issues of material fact. Any party designating an issue as a genuine issue of material fact wholly or in part because of the Postal Service's statement that data called for by §3001.64 are unavailable shall comply with the requirements of §3001.67b. Responsive statements will be permitted within 10 days of the filing of initial statements.

(c) Following the exchange of statements of issues called for by paragraph (b) of this section, the Commission will determine which issues constitute genuine issues of material fact and concomitantly order the limitation of trial-type hearing procedures to those issues. The order issued for this purpose will also set forth to the greatest extent feasible the procedures to be followed in disposing of issues not found to be genuine issues of material fact. According to the nature of the individual issue, these procedures may include.

- (1) Filing of written comments and reply comments;
- (2) Conference procedures, followed or accompanied by the filing of written comments and reply comments; and
- (3) Briefing and argument.

In determining the procedures to be followed with respect to issues not requiring a trial-type hearing, the Commission will seek to accommodate the needs of expedition and procedural fairness in accordance with section 3624(b) of the Act.

[45 FR 83226, Dec. 18, 1980]

§ 3001.67b Requests involving experimental changes—unavailability of data.

If the Postal Service believes that data required to be filed under §3001.64 are unavailable, it shall explain their unavailability as required by §3001.64(a)(2)(i), (ii), and (iv). In par-

ticular, if the experimental character of the request bears on the unavailability of the data in question, the Postal Service shall explain in detail the nexus between these circumstances. A satisfactory explanation of the unavailability of data will be grounds for excluding from the proceeding a contention that the absence of the data should form a basis for rejection of the request, unless the party desiring to make such contention (a) demonstrates that, having regard to all the facts and circumstances of the case, it was clearly unreasonable for the Postal Service to propose the change in question without having first secured the data which are unavailable, or (b) demonstrates other compelling and exceptional circumstances requiring that the absence of the data in question be treated as bearing on the merits of the proposal.

[45 FR 83227, Dec. 18, 1980]

§ 3001.67c Requests involving experimental changes—plans for data collection.

(a) In any instance in which the Postal Service designates as unavailable data called for by §3001.64, it shall, as part of its initial filing under that rule, either

(1) Describe with particularity the means it proposes to employ to collect those data, or

(2) State with particularity the reasons it believes establish that such data are unnecessary.

The Commission may by order require data to be collected during the course of the experiment which the Postal Service has not planned to collect, if it finds that a statement under paragraph (a)(2) of this section does not justify the omission to collect the particular data in issue.

(b) In the case of data which are not required to be filed under §3001.64, but which the Postal Service intends to collect during and for the purposes of the proposed experimental change, the Postal Service shall include in its initial filing a detailed description of the data involved, the uses to which they would be put, and the methods to be employed in collecting them.
